

NAKURU COVID-19 RISK MAP

Inhabited settlements at risk of COVID-19

- High risk
- Medium risk
- Low risk

Nakuru drone imagery basemap

COVID-19 risk index was derived from exposure (proximity to COVID-19 hotspots, such as: open markets, bus stops, garages, bodaboda sheds, informal shopping centres, churches, water points, and poor drainage sites) and vulnerability (population estimates per settlement and building type: formal and informal).
